### Description of Work (Physical Characteristics)

This project consists of the design and construction of an approximately 7,000 square foot installation, service and support facility. A high bay service area will be used to service vehicles as large as a full size fire truck and also includes benchtop work areas. An adjacent office area includes office space for technical support groups and a showroom for the LANL cellular phone and pager service. Sitework consists of a paved parking area for employees and visitors as well as minimal landscaping and drainage.

This procurement will use a two-step process – Step one will be Request for Qualifications (RFQ) and Step two will a Request for Proposals (RFP). Only those firms selected in step one will be sent the RFP.

To be placed on the List to receive the RFQ, please contact the undersigned.
