

# The LANL Unclassified Foreign Visits and Assignments Program

## Export Control Coordinators Organization Annual Training Seminar April 2010

Lori D. Hinojosa, UFV&A Program Leader

Los Alamos National Laboratory (LANL), Office of Counterintelligence

## History and Activity

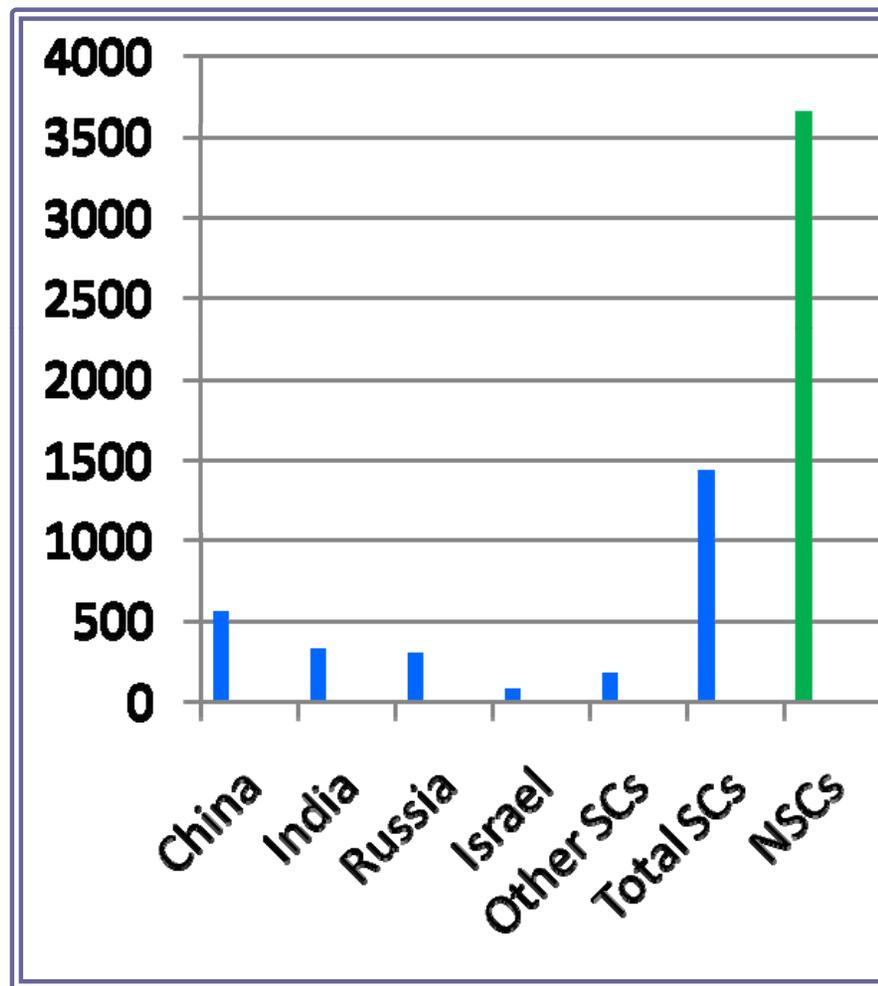

---

- **The LANL UFV&A program automated the approval process in June of 2008.**
- **Process improvement:**
  - Export License determination should occur when the host organization first submits the request
  - Corrective action will not be funded in this fiscal year.
- **Interim measure has subject matter experts review and assess each request.**
  - No mechanism for Export reviewers to deny or return a request.
  - They only enter their assessment for managers to review and approve or deny.
- **Current concerns:**
  - Hosts are inconsistent in providing detailed and accurate scope of work.
  - Requests are not always updated when the scope of work changes or research migrates into areas that may need to be protected

# Visit Activity

LANL processed 5081 requests for visits or assignments between 1/1/2008 and 3/3/2010\*

\* Counterintelligence Inspection period data

# How are requests reviewed and approved?
